IS 242 Web Application Development I

Lab sheet 9

Objective

The objective of today's lab is to get you to use some of the controls covered in the last lecture and to get you started on your project. By the end of this lab you should have:

- *Created web user controls.*
- *Created a tree view/menu to facilitate navigation.*
- *Used CSS to design your website.*
- *Decided on your team members.*
- *Read and understood the assignment specifications.*
- *Start reading chapter 5 to get help on how to get started with your project.*

The assignment specifications are available at the course web page, please do the following:

- Read and understand the assignment specifications. Ask if anything is not clear.
- Form groups of 2 to 3 members and register that with your tutor.
- Chapter 5 is all about putting together everything you've learned in a larger context. It guides you through building a complete web application, which will serve as a skeleton to build your own project. Use this chapter to learn how to approach your own project. All sections are useful but you can jump right to page 197 and start from there if you wish.

From now on, all lab sessions will be for you to work on your project with your team members.
